

# Port Economics, Management, and Policy

Theo Notteboom, Athanasios Pallis, Jean-Paul Rodrigue

***This textbook analyses the contemporary port industry and how ports are organized to serve the global economy and regional and local development needs.***

## **APPROACH:**

The authors of this book use a multi-disciplinary approach to illustrate how the global port industry operates relying on findings from the fields of economics, geography, management science, and engineering.

## **MAIN FINDINGS:**

- This textbook is available online to serve as a study aid for future students, teachers, and researchers in the fields of port economics and logistics.
- Chapters of the book focus on: ports and maritime shipping, contemporary ports, port terminals, port governance, port competition, port performance, port policies and development, port markets, and selected case studies.
